

CIWTC – THE IWT CONSULTANTS

CIWTC has opened a consultancy section from of Jan'2010 to provide advice on all the matters related to IWT Sector, be it operation and management of vessels, handling of cargos at the terminals, usage of waterways, conservancy of the rivers including 'Rick' survey, technical & navigations issues, types of infrastructure required to be developed to facilitate loading/unloading, ware houses & storage of cargos, Rules of the road, precautions and safety of men and material while riding the waves, pollution control maintenance of hull & machinery & barges and cargo loading on the barges etc.

At CIWTC, we have a pool of experts, including crews, whose qualifications, expertise and decades of experience are unmatched anywhere especially in the long haulage both upstream and down stream of the National Waterways I, II & VI and through the Sunderbans delta as well as in the protocol routes of Bangladesh.

We have various maintenance schedules for both hull and machinery of the IWT barges which have been developed over a period of time.

At the same time, we also have undertaken supervision of hull repairs as owner's representative. We also undertake supervision of vessels under construction which are covered under class viz. IRS, LRS & ABS etc.

The corporation also undertakes preparation feasibility/project report for new projects in the area of Inland Water Transport. The upgradation of additional facilities/infrastructures is also covered under the above consultancy services.

We also provide advice on tackling of emergencies due to accidents etc. and salvage of barges in the best possible way.

We also provide suitable barges and tugs for salvage of barges on a case to case basis.

All the above are available for a price. We are at your service anytime, any where as per your needs.
